Teacher Outreach Program

2019-20 School Year

At the Kloiber Foundation, we are dedicated to ensuring that every child has the opportunity to reach their full potential. Each year, we work with select schools in Fayette County to enhance their teaching environments. Your school has been chosen for a special program to help individual teachers enhance their classrooms with items that might otherwise slip through the budget. We understand that there are many costs associated with running a successful classroom, and teachers often cover those costs themselves. The Kloiber Foundation would like to help.

We know your time is valuable, so we tried to make the process as easy as possible. Simply tell us a little bit about yourself, what you would love to have in your classroom, and how those supplies would change your lessons for the better! We'd love to hear any idea, but anything under \$300 will be easier to process and approve by the end of the year. The only thing we ask for in return is that you share with us some photos of your students enjoying their new supplies - nothing makes us happier than seeing happy kids learning!

Because we are working with a number of schools each year, every school will have a priority fulfillment window where we will review applications only from that school. Applications received after the priority window will be reviewed in November and May. We look forward to working with you!

Send in your application to:

Marci Kloiber, Director of Public Relations
Kloiber Foundation
marci.kloiber@kloiberfoundation.org

Name and contact information:

School and Grade/Area Taught:

What supplies would you love to have?

Have you used them before? If so, in what capacity?

How would they improve your teaching environment?

Feel free to attach any additional information or photos you feel would be helpful in evaluating your request!
